REEL TECH
Toughest for the Roughest

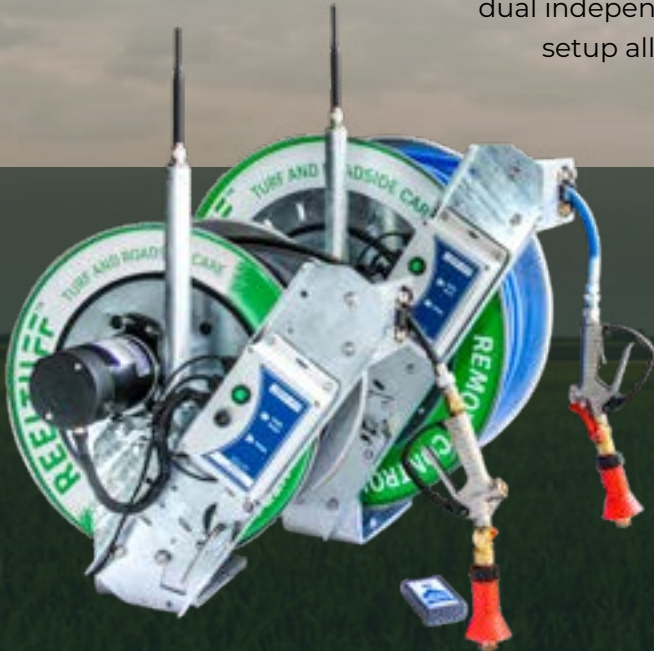

ABOUT REELTUFF™ PRODUCT

The REELTUFF™ reel is a world-patented, all Australian designed and manufactured direct drive hose reel. Featuring unmatched flexibility in size and capacity, adaptable Reel-In-Control™ remote and a unique Non-Belt/ Chain Safe-R-Reel™ gearbox that ensures a controlled speed during rewind. It offers superior craftsmanship and quality

galvanised construction, which has been proven to withstand some of the harshest environments in Australia.

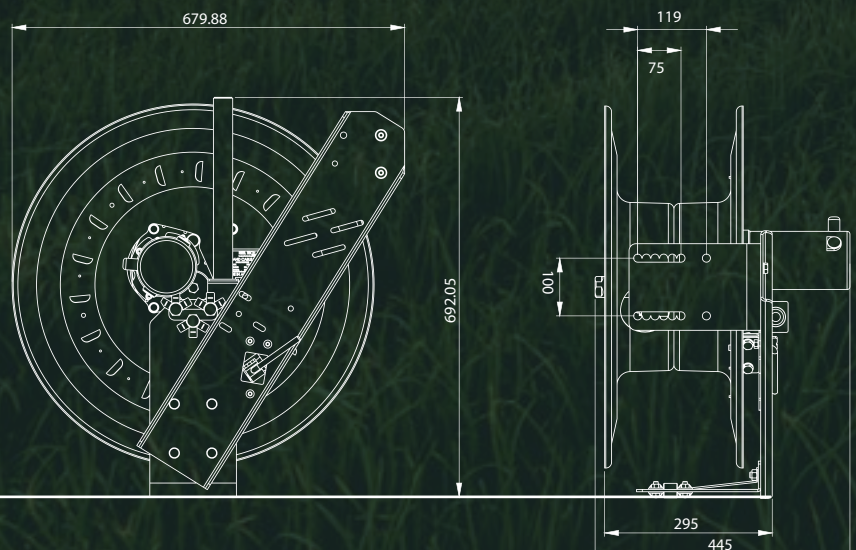

REELTUFF™ Hose Reels can be easily installed to many vehicles with 12V power supply including Utes, ATV's, tractors etc., and can be customised to suit your specific needs. Use as a single unit or in a mirrored configuration for dual independent hose reel setup allowing multiple

operators to cover large areas in half the time. Use REELTUFF™ Hose Reels with your spray equipment to enjoy the outstanding safety features, and achieve more spraying in less time and effort than conventional methods using manual reels. Benefit from the Reel-In-Control™ automatic hose rewind at a single press of a button, and the motor drive capable of safely retrieving the hose even at full extension.

- Hot Dip Galvanised Finish
- 12V (DC) & 24V (DC) Powered Reel
- Quick Change Hub System
- Reel-In-Control™ Long Range Remote Control
- 100m & 50m Reel Models (available custom lengths)
- Heavy Duty Construction
- Easy Mount Compact Modular Design (fully upgradable)
- Inlet/Outlet: 1/2" NPT Female connections
- 12 Months Warranty

Note: Spray Gun & Hose Sold Separately.
(Available as complete package.)

Mounting Dimensions
Note: 13mm dia. holes

REELTUFF™ 12V HEAVY DUTY REMOTE CONTROL HOSE REEL					
Product	Part Number	Width/mm	Height/mm*	Depth/mm	Weight/kg
100m Reel	147-ERT15-220-650TGS3K-12V	445	695	680	55
50m Reel	447-ERT15-220-475TGS3K-12V	445	545	565	45

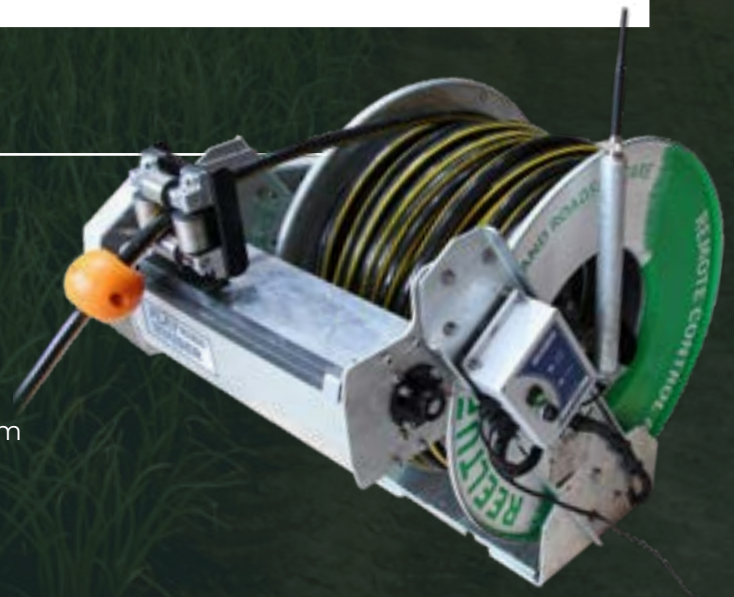

PRODUCT FEATURES

PRODUCT FEATURES	BENEFITS
Hot Dip Galvanised Discs & Frame	Superior corrosion and weather protection with ultimate scratch resistance over painted or powder coated reels.
Electric Safe-R-Reel™ Non-Belt/Chain Direct Drive System	More reliable and safer working conditions. This patented gearbox eliminates the use of chains, belts and sprockets that require regular maintenance.
Heavy Duty Thick Gauge Steel Construction	Stability and strength.
Cantilevered Spool Hub	Direct coupled to self-contained gearbox offers easy spool removal and is effectively maintenance free.
Stainless Steel Fluid Path High Pressure Full Flow Swivel at no extra cost.	Ensures minimum pressure drop across the reel. Can be used with most types of chemicals, including herbicides, fungicides, pesticides, etc.
Reel-In-Control™ Wireless Long Range Remote Control comes standard. 915 MHz for AU	Featuring frequency hopping technology which offers powerful and reliable connection. Provides interference or jamming immunity in various undulating terrains. Allows for up to 8 transmitters to be used in the same area.
Pin-Lock Comes standard to eliminate accidental unspooling of hose.	Spring loaded Pin-Lock with ratchet mechanism keeps hose safely on the reel and prevents hose or spray gun damage in transport.
50m or 100m Reels Optional 1/2" (12.7mm) O.D. and other width capacity are available upon request	Ideal for roadside spraying and/or lawn maintenance of any size including parks, golf courses and urban laor any agricultural application.

PRODUCT OPTIONS

Easy Mount Compact Modular Reel Design

- Galvanised construction
- Various drive options including 24V (DC) Electric, Air or Hydraulics
- Auxiliary Manual Crank Rewind
- EZI-DEPLOY™ - Auto De-clutching System
- FlatWinder™ - Automatic Hose Layering System
- Follow-Me Hose Guide
- Reel-In-Control™ - Wireless Remote controller
- Various Brake Systems and much more.
